

## Bulletin Volume 382-392

By Geological Survey

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1909 Excerpt: .but the waters of Iowa Creek, confined in the bottom of the narrow gulch, have in postglacial time removed all of the low-terrace gravels but these two patches. B. POSTGLACIAL CUT IN DRIFT AT MOUTH OF LITTLE EVANS GULCH, EVANS GULCH SYSTEM. Evans Gulch was occupied by a glacier from its head down to Leacliffe, a distance of GA miles. Two large cirques and one small one contributed ice to this glacier, which had a total area of GJ square miles. The head of this system took its ice from the slopes of Mount Evans and Dyer Mountain. This cirque is large and broadly Ushaped and is cut down into the pre-Cambrian gneiss. At its upper end the east wall of this valley rises in an almost perpendicular cliff below Dyer Mountain. Between Dyer Mountain and Mount Evans the divide shows serrate peaks where the Sacramento...

### Reviews

*I just began looking over this pdf. It is one of the most amazing pdf i have study. I discovered this book from my dad and i recommended this pdf to understand.*

-- Merritt Kilback II

*Good e book and useful one. I have got read and that i am confident that i will likely to go through once more again later on. It is extremely difficult to leave it before concluding, once you begin to read the book.*

-- Angela Blick
