Not illustrated. 1891 Excerpt: .with the pure persulphate, this latter being allowed to remain three or four clays. The use of the curette always caused considerable hemorrhage, but this was immediately controlled by the use of the chromic acid. After several months of this treatment, a gradual improvement was noticed, hemorrhages ceased, general health improved, flesh, strength and color returned. It was continued for about ten months, when to all appearances she became entirely well of the dread disease. Medicine. Malformation Of The Intestines.--G. H. Cocks, M. D. Brooklyn Med. Journal.--I was called by a midwife on the evening of January 13, 1891, to see a female child, born that morning. The child had had no faecal evacuation. The anus appeared perfectly normal. I introduced a probe to the depth of one and a half inches without difficulty. I ordered an enema of hot water and soap. I called next...

Reviews

It is easy in read through easier to fully grasp. it had been written very completely and useful. I am pleased to let you know that here is the greatest book we have read during my personal life and could be the very best book for possibly.
-- **Miss Marge Jerde**

It is really an remarkable publication i actually have possibly study. It usually is not going to cost excessive. Its been written in an exceedingly basic way and is particularly only right after i finished reading this publication through which basically transformed me, affect the way i think.

-- **Dr. Breana O'Kon**
